**METPRO ANNOUNCES MAJOR EUROPEAN ACQUISITION**

MetPro is pleased to announce that it has recently acquired the Anti-Corrosion division of Papiers A Paviot the well known French packaging company. With this acquisition "MetPro France" has now been established to continue servicing the Anti-Corrosion needs of the French marketplace.

MetPro Ltd is a leading provider of VCI Anti-Corrosion technology in both European & International markets and for the last 8 years both MetPro & Paviot have worked closely in the French marketplace to continually deliver a high level of service to its loyal French customers.

MetPro Ltd has an established track record for supporting and developing customized solutions for companies that wish to outsource VCI chemical ingredients, corrosion control technology and application support. MetPro Ltd's existing chemical manufacturing base continues to develop innovative quality products thereby sustaining its commitment to excellence in corrosion control.

"This acquisition enables us to offer our customers more cost effective anti-corrosion solutions as well as taking control of day-to-day operations, manufacturing, sales & marketing functions," said Rick Earley CEO of MetPro. With this acquisition we will significantly increased our coverage in the French marketplace which represents a significant step for MetPro in our strategy to accelerate our core business"
